Future Proof
Your Home With
Future Proof Solar

About Us

We help our customers future-proof their homes by providing solutions to suit their energy needs. Our UK based team specialise in the design, supply and installation of solar panel systems, battery storage systems and air source heat pumps.

Our services are supplied Nationwide, whether it is a domestic or commercial project we have you covered.

" Green energy is the future, let's reduce carbon emissions, starting with solar "

Managing Director

Johnathan Longden

" Energy bills are one less thing to worry about with solar energy "

Managing Director

Pavlos Demetriou

Future Proof Solar

Solar Company

Should you proceed to enquire at Future Proof Solar, our sales team will be in touch to discuss our solar services further with you. Whether you enquired to ask a question or for a free quote, we are always happy to help.

If you enquired to receive a quote, our team will commission an on site or online survey. The survey is carried out by one of our accredited solar PV surveyors.

After the site survey we will create a full system design and shading analysis. This will confirm the annual energy (kWh) production of the system.

Our lead time from deposit to installation is approximately 3-4 weeks.

Most installations are completed within one working day, if we anticipate it will be longer you will be made aware during the design stage.

The installation would be carried out by the following:

- Electrician
- Roofer
- Labourer

All members of our team are employed, we do not use sub-contractors.

Once your installation is complete, we will request the remaining balance to be paid on the day of completion.

You can pay the deposit or balance payment by;

- Debit Card
- Credit Card
- Bank Transfer

Upon payment of your deposit you will be registered with HIES and will be covered by their comprehensive deposit protection scheme.

Vision

Our vision is to help push the production of green technologies and practices. We want to do our bit in the battle against climate change.

As a business in the renewable sector we are passionate about making solar energy affordable and available for everyone. We are committed to build a place where people can come to discover more about solar and learn its long term values.

Mission

Future Proof Solar aims to promote our solar services to households and businesses across the UK.

As a business in the renewable energy sector our focus is on the customer's journey, customer care and after-sales service. We focus on the satisfaction of our customers and offering the most competitive quote. Our advisors are professionals in the renewable energy sector, installing solar systems and air source heat pumps across the UK.
