## Meet Harry

---

**Case Study:** Empowering Energy Independence - Harry's Solar Transformation

**Background:** Harry, a first-time homeowner and solo occupant sought a solution to manage his monthly expenses more effectively, especially in the current economic climate. The quest for a reliable solar panel company led him to our doorstep.

### **The Challenge:**

Being a one-man band in a single occupancy household, Harry aimed to reduce his monthly bills and sought a sustainable solution. His exploration into solar installation began months before he moved into his new home.

### **Our Approach:**

**Personalised Assessment:** Our dedicated team conducted an on-site assessment of Harry's new home, enabling us to understand the roof space and formulate a customised design plan tailored to his unique needs. A detailed, personalized quote was provided, empowering Harry to budget effectively for the solar system.

**Expert Advice:** Throughout the process Harry inundated us with questions, seeking reassurance for his household. Our team offered expert advice, elucidating the ways in which the solar system would reduce his monthly bills, instilling confidence in his decision!

---

## **The Solution:**

After meticulous evaluation of Harry's roof and expert consultations, he opted for the Livoltek Battery System paired with 8 Trina Solar Panels. The entire installation process, from start to finish, took a mere 4 hours, causing minimal disruption to Harry's day.

**Future Expansion:** Impressed by the seamless installation experience, Harry expressed interest in transitioning to an electric vehicle. Eager to continue his sustainable journey, he plans to reach out to us for the installation of an EV charging point in the future.

## **Savings and Tariff Optimisation...**

**Financial Impact:** Harry, initially projected to pay £120 monthly by his proposed energy provider, was pleasantly surprised to find his actual electricity bill at only £30 after the solar system's installation.

**Tariff Optimisation:** Guided by our team, Harry selected the right tariff, emphasizing the importance of tailored plans for different seasons.

## **Maximising Environmental Impact:**

**Grid Interaction:** Harry optimized his solar setup, selling excess electricity back to the grid during summer months for favorable rates.

---

**Environmental Consciousness:** Recognizing the positive impact on the environment, Harry valued contributing to a greener grid for the benefit of others.

**Efficient Installation Experience:** Harry commended the quick and easy installation process, expressing surprise at its efficiency. No disruption was caused to his daily routine.

**Harry's Testimonial:** Thrilled with the service, Harry awarded us a 5-star Google Review, stating:

*"I am really impressed with my solar system. The installation was smooth sailing, and the installers and staff were polite, knowledgeable, and hardworking. Eight panels and a battery fitted in just a few hours, worked immediately."*

Harry's story exemplifies our commitment to personalised, efficient, and environmentally conscious solar solutions, making a positive impact on both our customers and the planet!
